Clients -

Qritive: Worked on mapping library in the medical-healthline sector to create an application that renders tissues by zooming, cloning, annotating on them. Writing test cases and ensuring code-consistency and sanity checks.

Tamohara: Its a stock advisory platform its basically a dashboard. User will be a tamohara stuff. They will a created advisory on this platform send to click. I have handle a UI creating Advisory, converting excel to json, creating Advisory Pdf via aws lambda.

Designer World Brands: Its inventory management dashboard for watches/digital watch. Here also I have worked on frontend creating table with pagination, filtering data, etc.

Internal Application tool to design the frontend and implementation as per Figma. Worked on multiple project, created multiple complicated designs and writing the optimized code.

2021 - 2022

Axioned India Pvt Ltd

Software Enginner

Client -

Culture15: Survey Form dashboard using React.JS and Redux-toolkit. Analysis data and represent that data on UI. Dashboard contains 3 user level i.e., Admin, Partner and End-User(organization). And also created Culture15 survey form too.

Projects

Unix Interiors - <https://unixinteriors.in/>

Developed Backend and Frontend both. Advance user interface, handled every use case.

Frontend: React js, Styled component, material UI, partial js

Backend: Firebase

E-Commerce Sample Page - <https://react-sample-ecommerce.netlify.app/>

Features: - Auto load-more when its hit to bottom of the page (without using any package, self-coded), Search Option, Form Validation, Filter the product, Login and Logout (user: abhijeet, password: 12345678) username and password is hard coded, there is many more features.
